Forecast for Wednesday 05 Jan 2022

Weather:. Snow showers, mostly over eastern Cairngorms and Aberdeenshire hills continuing to die out during the morning. Otherwise a drier and brighter day with sunny spells and winds continuing to ease down.

Chance of cloud free mountain/hill tops above 800m: 50% in north in the morning, otherwise 90%.

Visibility: Patches of very poor visibility at first in north of area due to snow showers and blowing snow. Clouds coming well down the hills at first too. Otherwise the air will have great clarity resulting in excellent visibility. Mostly sunny skies across the Perthshire hills with clouds gradually lifting above the tops in the north.

Met Office Aberdeen Meteorologist's View

Improving conditions in the hills during the day. Note even with lighter winds in afternoon, it will still feel bitterly cold.

Forecast for Thursday 06 Jan 2022

Weather: Dry, bright start. Becoming cloudy during morning with outbreaks of sleet and snow in the afternoon. Snow will turn to rain below about 500m for a time but cold air returning during the evening. Snow will be accompanied by southerly gales resulting in blizzard conditions for time over higher ridges and summits, especially Perthshire. Staying drier in north of area.

Maximum wind: Southerly winds, average speeds 30 increasing 40mph during morning with gusts 60mph over the tops by afternoon. Winds becoming southwesterly in evening and speeds decreasing a little.

Chance of cloud free mountain/hill tops above 800m: 90% at first decreasing 30% by afternoon, best chances in north of area.

Visibility: Good during morning then very poor as snow sets in with navigational difficulties, especially over Perthshire and Angus hills. Clouds coming well down the hills. Visibility staying mainly good in north of area with cloud bases about 700m but some poorer conditions here too later in afternoon.

Temperature: **Glens:** Minus 7 Celsius at dawn, recovering to plus 2 Celsius early in afternoon.
At 800m: Minus 4 Celsius rising to Minus 1 Celsius for a time.
Freezing level: 200M rising to 700M for a time then falling to 400m during evening.
